```

A generic template to base your language-specific templates.

Features

- [\[GitHub Actions\]](https://github.com/features/actions) and [\[Woodpecker CI\]](https://woodpecker-ci.org) integration
- [\[lefthook\]](https://github.com/evilmartians/lefthook) pre-commit scripts
- [\[prek\]](https://github.com/j178/prek) pre-commit scripts
- [\[just\]](https://just.systems) and [\[go-task\]](https://taskfile.dev) task runners
- [\[comtrya\]](https://github.com/comtrya/comtrya) deployment runners
- [\[pipelight\]](https://pipelight.dev) CI pipelines
- [\[rcl\]](https://rcl-lang.org) and [\[kcl\]](https://kcl-lang.io) config languages
- [\[json\]](https://json-schema.org), [\[toml\]](https://toml.io), and [\[yaml\]](https://yaml.org) settings file formats
- [\[blake-3\]](https://github.com/BLAKE3-team/BLAKE3) and [\[minisign\]](https://github.com/jedisct1/rsign2) cryptographic checksumming and signing of releases
- [\[goji\]](https://github.com/muandane/goji) and [\[cocogitto\]](https://github.com/cocogitto/cocogitto) conventional / commitizen commit message linting
- [\[typos\]](https://github.com/crate-ci/typos) spell checking
- [\[git-cliff\]](https://github.com/orhun/git-cliff) keep-a-changelog changelog generator and version bumper
- [\[git-graph\]](https://github.com/orhun/git-graph) git history graph visualization
- [\[lychee\]](https://github.com/lycheeverse/lychee) link checker
- [\[superhtml\]](https://github.com/kristoff-it/superhtml) html linter
- [\[minijinja\]](https://github.com/mitsuhiko/minijinja) templating

- [treefmt](https://github.com/numtide/treefmt) and [typstyle](https://github.com/Enter-tainer/typstyle) code formatting
- [trivy](https://github.com/aquasecurity/trivy) and [trufflehog](https://github.com/trufflesecurity/trufflehog) security scanning
- [cargo-deny](https://github.com/EmbarkStudios/cargo-deny) and [cargo-auditable](https://github.com/rust-secure-code/cargo-auditable) license and SBOM management
- [venom](https://github.com/ovh/venom) and [hurl](https://github.com/Orange-OpenSource/hurl) test suites
- [rspress](https://github.com/web-infra-dev/rspress) and [mdbook](https://github.com/rust-lang/mdBook) documentation sites
- [typst](https://github.com/typst/typst) citations, footnotes, bibliography, tables, figures, diagrams, graphs, flow charts, math formulas, symbols, emoji, scripting, PDF and HTML exports
- [d2](https://github.com/terrastruct/d2) graphs
- abc and [basilk](https://github.com/GabAlpha/basilk) todo list / kanban manager

Install

```
cargo install just
just install
```

Build

```
just build
```

Dependencies

- basilk
- b3sum
- cargo-auditable
- cargo-deny
- cocogitto
- comtrya
- d2
- git-cliff
- git-graph
- goji
- go-task
- hurl
- kcl
- just
- lychee
- lefthook
- minijinja
- prek
- pipelight
- rcl
- rsign
- superhtml
- treefmt
- trivy
- trufflehog
- typst
- typstyle
